DD/ST# 3419-68

3 September 1968

25X1A

MEMORANDUM FOR: [REDACTED]

SUBJECT : Additional Information for the DCI's Annual Report to the PFIAB

REFERENCE : D/NIPE Memo to DD/S&T dtd 27 Aug 68, same subject

25X1A

1. I'm not sure that we really have anything significant to say on "coordination of the U.S. foreign intelligence effort". There was a rather staggering amount of wrestling around with drafts of what subsequently became the terms of reference for the new USIB Intelligence Information Handling Committee, COINS experiment management guidance, etc., but these are best spoken to by [REDACTED] of OPPB as the CIA IHC member or [REDACTED] of the DDI as CIA COINS Manager.

25X1A

2. I did allude to the study of the ADP security problem in the last paragraph of my regular submission--that study is a cooperative one involving [REDACTED] as the CIA member of the ARPA Steering Group; however, this is not under USIB auspices. That fact aside, it is premature to comment on progress realized.

3. Actually, D/NIPE's memo calls for concentration on the "actual analysis and dissemination of substantive information" which comment should come from our customers, as it relates to ADP, rather than from us.
